

GERMAN VEHICLE NOTES:

1. SPW 251/17 - Schützenpanzerwagen (2 cm). Anti-aircraft vehicle armed with a 2 cm KwK38 on a pedestal mounting with the Gun's shield to protect the gunner. It represents also "2 cm Flak 38 auf SPW

(Sd.Kfz. 251)" released in 1943. The counters of this vehicle is included in Prokhorovka! game.

† This vehicle may have its superstructure walls folded down to enhance the use of its gun, Therefore, it has two different versions—one on each side of the counter. The "Close" side has the higher MP allotment, but cannot fire at any target at a lower level than itself. The "Open" side cannot fire at any target at a lower level than itself *and* that lies within the VCA or Rear VCA. Flipping the counter from one side to the other can be accomplished only with its crew CE, and only during a fire phase in which the vehicle does not enter a new hex, and as if the vehicle were a gun being unlimbered (C10.21-.22) [EXC: *the crew remains inherent to do so*]. While in "Open" mode, the CE DRM is +1 vs fire that does not emanate from within the VCA or Rear VCA.

WGT: 9; BPV:47; Notes: N;† 1943+ (1.6)
